

## **loneSum**

```
public int loneSum(int a, int b, int c) {  
    int sum = 0;  
  
    if (a == b && b == c) {  
        sum = 0;  
    }  
    else if (a == b) {  
        sum += c;  
    }  
    else if (a == c) {  
        sum += b;  
    }  
    else if (b == c) {  
        sum += a;  
    }  
    else {  
        sum += (a + b + c);  
    }  
    return sum;  
}
```
