Celsius to Fahrenheit Table

```
Module main()
        Declare Integer celsius
        Declare Integer fahrenheit
        Set celsius = 0
        Display "Celsius        Fahrenheit"
        Display "--------------------------------"

        While celsius <= 20
                Set fahrenheit = (celsius * (9/5)) + 32
                Display celsius, "        ", fahrenheit
                Set celcius = celsius + 1
        End While
End Module
```
